Randy had a buck for his dad who under went open heart surgery last Friday and is doing well.

Program:

We had a fascinating program today presented by Tom Skinner; the topic was on his collection of bicycles. He brought four bikes built in the 30's and 50's to give us an idea of the way they were built and what materials were used to build them.

One would not think that aluminum was a material used to build bikes in the 30's. He told us the stories behind each bike, how they were acquired and what he had to do to restore some of them.

Did you know that the land speed record for a bike being peddled on a flat surface by a human being without outside assistance was set in 1941 at a speed of 108 mph.

We didn't either.

Thanks to Davis fleig for taking the notes. Members having information for future newsletters can email editor@janessvillekiwanis.org.
